### MIGHTY PLEASED

"We used five Shorthorn and five whiteface bulls on our whiteface cows. Our crossbred calves averaged 562 lbs. at weaning which was 52 lbs. over the average on the straightbreds. We have had no pink eye problems with our crossbreds and are certainly pleased with the crossbred program."

## INCREASED CALVING PERCENTAGE

"I had a 92 percent calf crop with my straightbreds. When I crossed with Shorthorns that percentage climbed to 95 percent. When I mated the Shorthorn crossbred females, the percentage was hiked to 97 percent on 150 females. Half of the calves arrived the first three weeks of the calving period and 80 percent came the first six weeks. There is plenty of profitable fertility in an infusion of Shorthorn blood for any commercial breeder."

These figures reveal that the average Shorthorn carcass studied was **WORTH \$27.88 MORE THAN THE AVERAGE HERFORD CARCASS STUDIED AND \$38.95 MORE THAN THE AVERAGE ANGUS CARCASS STUDIED.**

There is no such thing as a bum steer! And we really mean that. The dependable **SHORTHORN INFLUENCE** makes it so . . . profitably erasing a host of appreciable characteristics from the very first generation, then succeeding to work monetary miracles on each thereafter. **RUGGED, BEEFY, PERSISTANT SHORTHORN AND POLLED SHORTHORN BULLS . . .** on ordinary or best range cows, no matter their breed . . . assure high-percentage calf crops. As reds, whites, roans, you will find the **SHORTHORN INFLUENCE** means more "folding money" at market-time. At weaning they are heavier . . . finished cattle get there faster. Don't you be swayed by hearsay . . . ask for facts about **SHORTHORNS** before nodding "Yes" to this season's bull needs! Incidentally, we have bulls with, or without, horns, whichever suit your taste.

# STANDARD GUARANTEE

Recommended by American Shorthorn Association

- A. Proper care must be given by purchaser to protect breeding qualities and health of guaranteed animals.
- B. All bulls are guaranteed breeders, provided they are not allowed to serve when under 14 months of age, or allowed to run with the herd when under 20 months of age. In case of failure of a bull to a breeder, notice shall be given to the seller within six months of date of purchase, or by the time the bull is 20 months of age, if purchased under 14 months of age.
- C. When an animal fails to comply with the above guarantee the seller has the option of substituting an animal of equal value to the satisfaction of the purchaser, or of having the animal returned for a trial for a period not to exceed six months. The expense of a freight in such case is to be paid by the seller. If the animal is then proved to be a breeder beyond doubt it shall be returned to the purchaser at his expense. In case of dispute the return of the full purchase price, without interest, to the buyer will be considered full settlement and satisfaction to all claims. No charge for feed or maintenance shall be made by either buyer or seller. Salvage shall go to the seller. It shall be understood that the same guarantee given for the first animal shall likewise apply to any animal later substituted.
- D. In the event an animal is returned by the buyer to the seller as a non-breeder the buyer must furnish to the seller a veterinarian's certificate showing that his herd is healthy if such a certificate is required by the seller.
- E. All animals catalogued have been tested for T.B. and are clean, and have also passed a test for Brucellosis thirty days prior to the sale, or are accompanied by a Bangs Vaccination Certificate. Announcements will be made covering animals not clear from vaccination.
- F. Certificates of registry and transfer will be furnished with each animal sold.
- G. All prospective buyers should check health requirements of their states. Health certificates will be provided with each lot sold.
